

Assignment-02

In []:

```
1 1. What is a List?
2 2. What is a Tuple?
3 3. What is the difference between List and Tuple?
4 4. Python Program to find the largest element in the list
5 5. Python program to interchange first and last elements in a list.
6 6. Python program to swap two elements in a list
7 7. Python program to Reverse a List
8 8. Python program to count occurrences of an element in a list
9 9. Python program to find the sum of elements in a list
10 10. Python program to Multiply all numbers in the list
11 11. What are the ways to find the length of a list
12 12. Python program to find the smallest and largest number in a list (Without
13 min-max function)
14 13. Python Program to find the area of a circle
15 14. Take inputs from the user to make a list. Again take one input from the user
16 and search it in the list and delete that element, if found. Iterate over a list
17 using for loop.
18 15. You are given a list of integer elements. Make a new list that will store a
19 square of elements of the previous list. (With and without list comprehension)
20 i. Input_list = [2,5,6,12]
21 ii. Output_list = [4,25,36,144]
22 16. WAP to create two lists, one containing all even numbers and the other
23 containing all odd numbers between 0 to 151
24 17. Python program to Count Even and Odd numbers in a List
25 18. WAP to make new lists, containing only numbers which are divisible by 4, 6,
26 8, 10, 3, 5, 7, and 9 in separate lists for range(0,151)
27 19. From a list containing ints, strings, and floats, make three lists to store them
28 separately.
29 20. What's The Difference Between The Python append() and extend() Methods?
30 21. Write a Python program to append a list to the second list
```

In []:

```
1 22. Write a Python program to find the third-largest number in a list
2 23. Write a Python program to get the frequency of the elements in a list.
3 24. Write a Python program to check whether a list contains a sublist
4 25. Write a Python program to generate all sublists of a list
5 26. Write a Python program to find common items from two lists
6 27. How to flatten a list in python?
7 28. How to sort a list in ascending and descending order without using the sort
8 function?
9 29. How to sort a tuple?
10 30. Write a Python program to convert a list of multiple integers into a single
11 integer
12 a. [11, 33, 50] >>> 113350
13 31. Difference between del and clear?
14 32. Difference between remove and pop?
15 33. Difference between indexing and Slicing?
16 34. Difference between sort and sorted?
17 35. Difference between reverse and reversed?
18 36. Difference between copy and deep copy?
19 37. How to check whether the list is empty or not?
20 38. How to concatenate two lists?
21 39. How to find the occurrences of an element in the python list?
22 40. How to flatten a list in python.
```
